

Y5 Computing Summer 1 Enrichment Homework

Computer Plans

Create your ideal bedroom in Google Drawing, Paint, Publisher or another graphics package using only the shapes available in the insert -> SHAPE/Text Box section. No clipart please. You have to draw simple shapes from a 'bird's eye' view (from above) that will represent the different items in the rooms.

This will be done by inserting shapes of various sizes into your design.

Each shape should represent an ideal bedroom item e.g. bed, desk, lamp.

You can be as imaginative as you like but please ensure you label each item with a text label so that the reader can easily identify the various items in your design.

To be successful I am looking for:

- A high standard of presentation
- Original and imaginative ideas
- Colourful designs, clearly drawn
- Use of a variety of tools/shapes

This can either be printed and glued into your homework book or turned in on Google Classroom via your Computing classroom.
