Parts of a computer

Instructions

- Complete a *mind-map* with text, images and colour and present on A4 paper - drawn by hand or on a computer

- Include information and images about the following:
    - **main parts (components) of a computer and their role** (i.e. what they do)
    - **input and output devices:** definitions and examples
    - **operating systems:** names, features and the differences between them

Remember … one of the main purposes of a mind-map is to link ideas, themes and concepts together using connective lines and associated colours
